Bob Eaton
Seattle City Light
1015 Third Ave.
Seattle, WA 98104

Dear Mr. Eaton:

Your quick education of City Light's operating procedures has proven most helpful. Our tour of South Substation that you arranged put all your comments in perspective. It is invaluable to actually see a facility and be able to put the word "capacitor" together with the visual concept. PCB's seem to be a controllable toxic material, and City Light has taken positive steps towards that control.

Thank you for sharing your thoughts and ideas on the problems you have encountered.

Sincerely,

Peter M. Orser
